2019 TRAINING COURSES

ADVANCED TRAINING COURSES	3
AROMATHERAPY.....	4
CONTROLLED RADICALAR POLYMERIZATION.....	5
SOLID STATE AND CRYSTALLIZATION OF SMALL MOLECULES.....	6

ADVANCED TRAINING COURSES

These training courses are given by the best worldwide specialists of the domain. Their goal is to update the scientific knowledge on a specific domain. Given in English, they are mainly dedicated to researchers.

CDP-Innovation is agreed as a training course organism.

AROMATHERAPY

Training presented in partnership with

Date: 6-7 May 2019

Venue: Lyon

Audience: Researchers (Doctors, Engineers, Technicians)

Price: 1600 € (VAT excluded)

Language: English

Duration: 12 hours

Speaker: Nadine Martinet (Université de Nice)

Number of attendees limited to 20

Outlook

The training will cover the definition and the legal framework of aromatherapy, the mechanisms of action of essential oils, dosage forms and administration mechanisms, essential to aromatherapy precautions. The 10 most used products in aromatherapy will be the subject of a detailed review including activity, the results of clinical trials...

Detailed programme, please contact: formation@cdp-innovation.com

CONTROLLED RADICALAR POLYMERIZATION

Date: 23-24 September 2019

Venue: Lyon

Audience: Researchers (Doctors, Engineers, Technicians)

Price: 1600 € (VAT excluded)

Language: English

Duration: 12 hours

Speaker: Dr Didier Gigmès (Université d'Aix-Marseille)

Number of attendees limited to 20

Outlook:

The development of controlled radical polymerization has allowed the preparation of new polymers (block polymers, comb polymers) with totally new or even unexpected properties. Dr. Didier Gigmès, research director at the CNRS and specialist in this field, will review radical polymerization techniques and the development of these new materials.

Detailed programme, please contact: formation@cdp-innovation.com

SOLID STATE AND CRYSTALLIZATION OF SMALL MOLECULES

Training presented in partnership with

Date: 16-17 September 2019

Venue: Nice

Audience: Researchers (Doctors, Engineers, Technicians)

Price: 1600 € (VAT excluded)

Language: English

Duration: 12 hours

Speaker: Dr Pierrick Marchand (Holodiag)

Number of attendees limited to 20

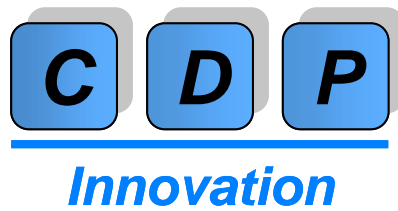

Outlook:

This training aims to familiarize the participants with the different forms of solid state (polymorphs, solvates, ...) and to propose methodologies for the development and the realization of a crystallization..
